Summary

More than three years of expertise designing and implementing web applications as a Full Stack Developer. Having an ability to manage databases, simplify cloud infrastructure, and skilled in both front-end and back-end development. Ability to increase user experience, optimize development processes, and boost application performance.

Education

Seneca Polytechnic

Advanced Diploma Computer Programming and Analysis

September 2021 - December 2024

Toronto, ON

Experience

Wengy Group

Full-Stack Developer

Aug 2024 – Present

Toronto, ON

- Managed the creation and upkeep of an online clothes store with JavaScript, HTML5, CSS3, and PHP, guaranteeing a fluid user experience on a variety of devices and responsive design.
- Using Node.js and Express, I designed a microservices-based backend that reduced server load by 30% and improved API response time by 25%.
- Directed a cross-functional team that used React and Redux to develop creative features for the online store, increasing user engagement by 20% in the first month of launch.
- Optimized MySQL and MongoDB queries to increase database speed, which resulted in a 15% decrease in page load times and a notable boost in overall application performance.
- Managed database administration and maintenance efficiently using phpMyAdmin, ensuring data integrity and streamlined operations.

TapCon Group

Front-End Developer

Jan 2024 – Aug 2024

Toronto, ON

- For a variety of clients, I created and designed unique landing pages with interactive features and interactive UI elements using Framer Motion that increased user engagement by 30%.
- Using HTML, CSS, Tailwind CSS, JavaScript, and modern frameworks like React, responsive web designs were implemented, resulting in a 25% decrease in mobile bounce rates.
- Transaction success rates increased by 40% as a result of the integration of secure payment processing solutions.
- A 35% boost in client satisfaction resulted from close collaboration with clients to understand their demands and convert them into beautiful, useful websites.
- 20% faster page loads were achieved by optimizing website speed and guaranteeing cross-browser compatibility.
- Projects finished on schedule while keeping the best practices and high development standards.

GAOTek Inc.

Software Developer

April 2023 – Aug 2023

Toronto, ON

- Configured services such Cloud SQL, GCP VMs, and Cloud Storage; coordinated the implementation of cloud infrastructure on AWS and Google Cloud Platform.
- Created a thorough framework using Vue.js that includes custom directives, modular components, and Vuex state management. By guaranteeing code consistency and expediting the development process for multiple projects, this framework reduced development time by thirty percent.
- Coordinated the switch to Apollo GraphQL and Vue.js from outmoded technology, enhancing the scalability and performance of the application. Developed a modular architecture in close collaboration with cross-functional teams, enabling smooth integration with current systems and reducing feature development time by 40%.

Technical Skills

Languages: HTML/CSS, JavaScript, Kotlin, Swift, Java, Postgres, C/C++, TypeScript, Python, JSON, SQL

Frameworks: React, Vue.js, Express.js, Tailwind CSS, Framer Motion, Bootstrap, jQuery, Bootstrap, Flask, ASP.NET, Node.js, Android SDK, iOS SDK

Cloud: AWS, Azure Cloud

Concepts: Encryption, Decryption, API, Database Normalization, Agile Methodology, Cloud Computing
